

From the idea to the product

SINCE 1989, WE HAVE BEEN THE TECHNICAL PARTNER
FOR THE DEVELOPMENT AND MANUFACTURING OF PRODUCTS
IN TECHNOPOLYMERS AND LIQUID SILICONE RUBBERS (LSR)

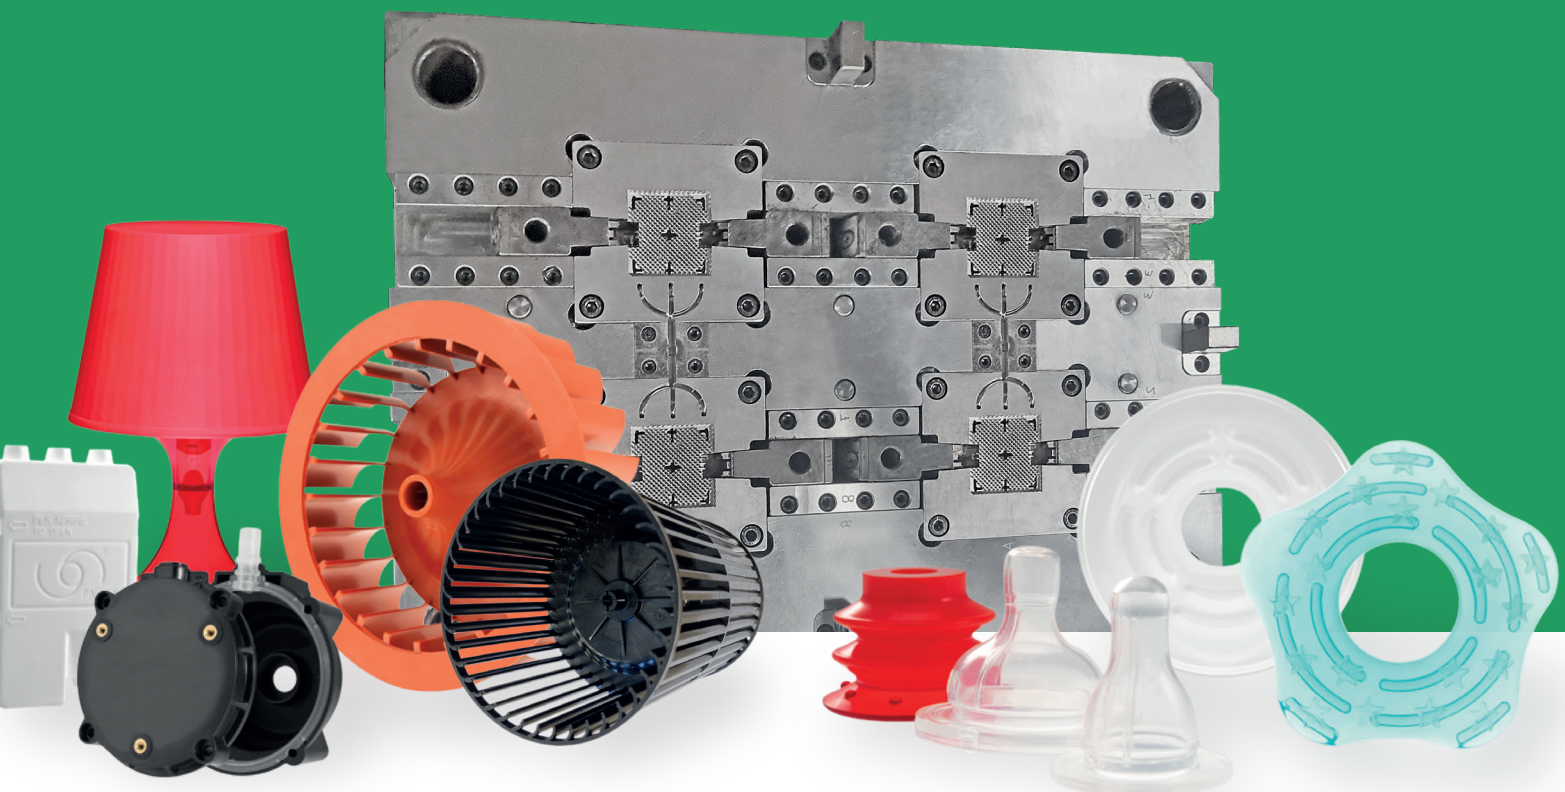

CO-DESIGN AND
INDUSTRIALIZATION

MOLD DESIGN
AND MANUFACTURING

INJECTION MOLDING
OF THE FINAL PRODUCT

THE MOLD FACTORY: THE HEART OF DUEPI

We provide integrated solutions for the design, manufacturing, and maintenance of molds and industrial equipment, supporting customers at every stage of the industrialization process.

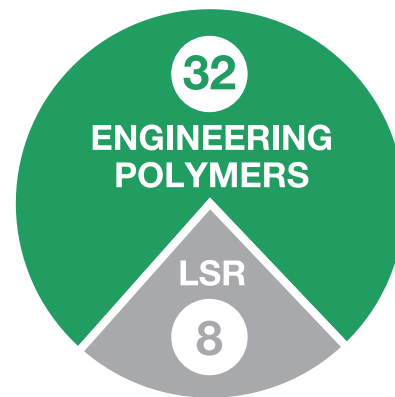

Thanks to our in-house mold shop, we can optimize development times and ensure quick and effective interventions in case of any issues.

AN EFFICIENT PRODUCTION PROCESS

We can count on a total of 40 injection molding machines in-house with a tonnage starting from 35 up to 500 tons.

Each production cell is internally designed to optimize costs and ensure the required quality, guaranteeing an efficient and high-performance manufacturing process.
